INTRODUCTION

This report summarizes the import interception records of the Plant Protection Division, Agriculture Canada, for the period April 1, 1985 to March 31, 1986.

The report includes plant pests found on, or associated with, plants and plant products, baggage, cargo, mail and other carriers entering Canada.

The Host and Origin lists provide only the name of the pest organism. More complete information is available in the Pest List. These lists include pests which are considered to be of plant quarantine interest or which may be of interest because they are new interceptions from the country of origin, new to the host plant, or of limited distribution in Canada. Certain pests have also been included because there is insufficient information at present about their significance and/or distribution in Canada. A large number of the more commonly intercepted insects, mites, molluscs, fungi, bacteria and nematodes have been excluded.

The majority of identification is done by staff of the Diagnostic Services, with support from specialists in the Research Branch of Agriculture Canada.

Molluscs are verified with the aid of collections and staff at the National Museum of Canada, Ottawa, or by other specialists.

Virus indexing is performed at the Saanichton Plant Quarantine Station in Sidney, British Columbia.

Further information may be obtained from:

INTRODUCTION

Le présent rapport constitue un résumé des interceptions effectuées à l'importation par la Division de la protection des végétaux du Canada durant la période du 1er avril 1985 au 31 mars 1986.

Ce rapport porte sur les phytoparasites trouvés en relation directe ou indirecte avec les plantes et les produits végétaux, les bagages, les marchandises, le courrier et des autres transporteurs qui entrent au Canada.

La liste des hôtes et la liste des pays d'origine ne donnent que le nom des ravageurs. Pour de plus amples renseignements, on doit consulter la liste des ravageurs. Ces listes comprennent les ravageurs d'importance de quarantaine ainsi que ceux qui présentent un intérêt particulier parce que c'est la première fois qu'on les intercepte du pays d'origine, parce que c'est la première fois qu'on les retrouve sur la plante hôte ou parce que leur répartition au Canada est limitée. Certains ravageurs ont été inclus arbitrairement parce qu'il n'y a pas suffisamment de renseignements disponibles en ce qui concerne leur importance ou leur répartition géographique au Canada. Un grand nombre d'insectes, d'acariens, de mollusques, de champignons, de bactéries et de nématodes qu'on intercepte régulièrement ont été exclus de la liste.

La plupart des identifications sont faites par le personnel professionel de la Section des services de diagnostiques phytosanitaires avec l'aide des spécialistes de la Direction générale de la recherche d'Agriculture Canada.

Les mollusques sont vérifiés au moyen des collections des Musées nationaux du Canada à Ottawa avec l'aide de leur personnel, ou par d'autres spécialistes.

L'indexage des virus est effectué à la station de quarantaine des plantes de Saanichton à Sidney (C.-B.).

De l'information additionelle peut être obtenue en communiquant avec:

NUMBER OF INTERCEPTIONS / NOMBRE D'INTERCEPTIONS

This report covers only import interceptions which were submitted to Ottawa during the fiscal year 1985-1986.

Table 1 summarizes data on the Pest List, which follows.

Ce rapport présente seulement les renseignements relatifs aux ravageurs qui ont été interceptés à l'importation et dont un spécimen a été soumis à Ottawa pendant l'année financière 1985 - 1986.

Le tableau I résume les données dans la Liste des ravageurs, qui suit.

TABLE I / TABLEAU I

PEST ORGANISMS / ORGANISMES RAVAGEURS	NUMBER / NUMÉRO 1985-1986
ARTHROPODS AND MOLLUSCS/ ARTHROPODES ET MOLLUSQUES	288
NEMATODES/NÉMATODES	114 *
FUNGI AND BACTERIA/ CHAMPIGNONS ET BACTÉRIES	232
VIRUSES/VIRUS	44
GRAND TOTAL / SOMME TOTALE	678

* 416 samples analysed / 416 échantillons analysés.

PEST LIST / LISTE DES RAVAGEURS

(Abbreviations/Abréviations)

Intended-use categories / Catégories d'usage prévu:

P propagation
C consumption / consommation
O other / autre
- unknown / inconnu

Transport categories / Modes de transport:

B baggage (air passenger) / bagage (par avion)
C cargo / marchandise
M mail / poste
O other / autre

Provinces:

AB Alberta
BC British Columbia / Colombie-Britannique
MB Manitoba
NB New Brunswick / Nouveau-Brunswick
NF Newfoundland / Terre-Neuve
NS Nova Scotia / Nouvelle-Écosse
ON Ontario
PE Prince Edward Island / Île-du-Prince-Édouard
PQ Quebec / Québec
SK Saskatchewan
